

ATD – Re-Ordering Inventory AV Ref # 638

There is also a video showing how to perform this function: How to Perform This Function (2:27) – AV Ref# 318

About:

BPOS provides a very simple method for re-ordering from ATD right from your software, based on your inventory's set stocking levels. Even if you don't currently utilize stocking levels, you can still use this function to easily build a purchase order and submit directly to ATD right from within BPOS.

How:

- 1. Click on **Views** \rightarrow **Receiving**.
- 2. Click on the **Stock PO** icon on your toolbar:

- On the Build Restocking PO screen (shown below), set your vendor to ATD by clicking the binoculars beside Vendor # and looking up ATD. Double-click on your ATD vendor to select them.
- 4. If you wish to narrow down your selections, do so using one or more of the selection options provided. For example, if you only want to return results for a certain manufacturer, you would key in your MFR code in the **FROM** and **TO** fields for Manufacturer's Code.
- 5. If you do not use stocking levels, you may need to check the box beside **Show Items w/Quantity On Hand Over Zero**.
- 6. Depending on the frequency of your orders, you may want to edit the date range used for reporting at **Sold & Transfers From**.

- 7. Click on the **Fetch Items** button:

- 8. On the **Build Restocking PO** screen (shown below), you can review the movement each item.
- 9. Edit your suggested re-order quantities as needed.
- 10. If your results cover several pages, you can either hit your **Page Down/Page Up** keys on your keyboard to navigate to the next page or a previous page. Or, click the **Next Page/Prev Page** buttons at the bottom of the screen.
- 11. View the number of items to be ordered and expected cost.
- 12. Once you have reviewed and edited your order, click on the Build PO button at the bottom of the screen. You will get a **Create Stocking PO** pop-up window. Click the **Create Purchase Order** button to create a new PO:

- 13. Once you are on your new PO on the **Receipts/Transfer View/Edit** screen (shown below), you will be prompted to use the Active Vendor. Since we've already selected ATD as our active vendor, you can click **OK**.
- 14. Click on the Line Items tab.
- 15. Click on the Check & Order Parts/Tires button at the bottom:

- 16. A **Check & Order Parts** screen will open to show you what you have ordered, what they currently have in stock, and the replacement cost. Items in pink indicate ATD is currently out of stock for those particular items. You can right-click on any item to exclude it from the order if you want to do so.
- 17. Based on your ATD configuration setup, the order options at the bottom will be defaulted to one of the **Order Modes** but you can change that if necessary.
- 18. Click the **Order Parts/Tires** button which will transmit the order to ATD and then automatically return an order number to your ticket as reference for each item:

Screenshot of returned order number:
